Experience

Freelancer | Fullstack Developer *Link | github* **April - June 2025**

- Developed a full-stack business management system for a construction-based seller (inventory, billing, customers)
- Built scalable frontend + backend architecture ensuring smooth data flow
- Implemented speech-based login + Firebase OTP authentication
- Designed secure access system with restricted routes and layered authentication

Skills

- **Programming Languages:** JavaScript, C++, Java
- **Libraries/Frameworks:** React, React Native Expo, NodeJs, Express, NextJs, Spring Boot, Jwt Auth, Tailwind
- **Tools / Platforms:** Git & GitHub, Figma, Vercel, Render, Netlify, Supabase
- **Databases:** MongoDB, MySql, PostgreSql, Redis

Projects

ECOSetu *Link | github |ApiDocs* **Jan 2026** NextJs, Postgresql, JWT, NodeMailer

- Developed a PLM + ERP system to streamline manufacturing workflows, product lifecycle, and operations
- Implemented product versioning and engineering change management for efficient tracking
- Designed backend architecture using Next.js, PostgreSQL, JWT, NodeMailer
- Focused on secure, scalable, and globally accessible system design
- Built as part of Odoo x Adani University Hackathon (Team CodingKarma)

Outfits Of Joy *Link | github |ApiDocs* **Jan - Feb 2025** Node.js, Express, MongoDB, React, Razorpay

- Built a full-stack clothing rental platform with admin dashboard and user system
- Developed features including cart, orders, favorites, and profile management
- Implemented secure authentication using Auth0 and JWT
- Integrated Razorpay payment gateway for seamless transactions
- Designed backend with Node.js, Express, MongoDB, Cloudinary and frontend using React (Vite)

FarmTrust *Link | github|ApiDocs* **March 2025** Node.js, MongoDB, Express, React, I18next

- Developed an e-commerce platform for verified organic farmers to sell products
- Introduced certification and verification badges to enhance user trust
- Built backend services using Node.js, Express, MongoDB
- Implemented multilingual support using i18next for wider accessibility
- Created during Odoo x Gujarat Vidyapith Hackathon

GraspCheck *github* **June 2025** Browser Extension, Gemini API

- Built a browser extension to generate MCQs from technical articles (GFG, W3Schools, GitHub)
- Integrated Gemini API to analyze content and generate quizzes
- Designed system to evaluate comprehension and provide instant scoring Improved learning retention

LeetCode-Smart-Analysis *github* **Jan 2026** React, Browser Extension, OpenRouter API

- Developed a Chrome extension to provide AI-powered approach suggestions
- Implemented time and space complexity analysis directly in LeetCode interface
- Integrated OpenRouter API for intelligent problem-solving assistance
- Enhanced coding efficiency by delivering insights within the workflow

Other Projects *Link* **2024 - 2026** React Native Expo, Next js, Spring Boot, Node js

- Worked across React, React Native, Next.js, and Spring Boot ecosystems
- Built multiple applications including YouTube clone, SIP analyzer, multiplayer game
- Developed Setulink (custom npm CLI tool) to expose localhost to the cloud

Certificates

- Odoo X Gujarat Vidyapith Hackathon (Odoo)
- Odoo X Adani University Hackathon (Odoo)
- Full Stack Development (Infosys|Springboard)
- React (HackerRank)
- Node Js (HackerRank)
- JavaScript (HackerRank)
- Sql (HackerRank)
- Rest Api (HackerRank)
- More ...

Education

- Rai University Ahmedabad — Ahmedabad, India
  B.Tech Computer Science Engineering 2024 - 2028
  CGPA: 9.24
- Kendriya Vidyalaya Dhrangadhra — Dhrangadhra, India
  12th Grade
